

Quasar Medical Leverages Workday AI-Powered Platform to Scale Global Manufacturing Capabilities

Global CDMO Standardises Talent and Payroll Processes on a Unified System to Drive Operational Excellence and Scalable Growth

HONG KONG, June 16, 2026 – [Workday, Inc.](#) (NASDAQ: WDAY), the enterprise AI platform for HR, finance, and IT, today announced that Quasar Medical, a global contract development and manufacturing organisation (CDMO) specialising in minimally invasive medical devices, is leveraging Workday’s AI capabilities to manage its international workforce and payroll operations.

By adopting a unified, AI-driven approach, Quasar Medical has streamlined its global operations to support high-precision manufacturing across 11 facilities in China, Singapore, Thailand and Mexico.

With a workforce of over 4,500, Quasar Medical requires deep visibility to maintain the rigorous quality standards of the medical device industry. Through [Workday Human Capital Management \(HCM\)](#), the organisation utilises AI-powered insights to manage specialised engineering talent and maintain the complex certification records essential for medical-grade micro-assembly. This AI-driven foundation helps ensure that as Quasar expands its manufacturing footprint, it maintains operational consistency and compliance across all jurisdictions.

“In the CDMO industry, precision and compliance are the foundations of our business. As we scale globally, our technology must match our technical standards,” said **Linda Tung, Vice President, Global HR and Corporate Affairs at Quasar Medical** “Workday’s AI-driven platform provides the unified visibility we need to manage a highly specialised workforce, allowing us to focus on delivering high-quality medical solutions while maintaining seamless compliance across multiple markets.”

To address the complexities of cross-border expansion, Quasar Medical utilises Workday Global Payroll Connect to navigate diverse labour regulations and payroll requirements across its Asian hubs. Furthermore, by deploying [Workday Talent Optimisation](#) and [Workday Learning, powered by Sana](#), the company leverages AI to identify skill gaps and strengthen internal development pipelines. This helps ensure that the specialised technical expertise required for complex medical devices is cultivated and retained within the organisation.

“Quasar Medical is a prime example of how forward-thinking organisations use AI to navigate the complexities of global expansion,” said **Daniel Cham, General Manager for Workday Greater China**. “By consolidating people and payroll data on a single AI-powered platform, Quasar is able to turn workforce data into actionable insights, supporting both its specialised employees and its long-term growth objectives in the medical device sector.”

To further enhance operational agility, Quasar Medical is leveraging [Workday Peakon Employee Voice](#) to capture real-time, AI-analysed sentiment data across its manufacturing facilities. These insights help enable management to proactively address workforce needs and improve engagement, which is critical in a competitive global market for engineering talent.

The integration of these AI capabilities underscores how data-driven intelligence allows global organisations to navigate complexity and scale with precision in highly regulated industries. By centralising critical workforce and payroll data, Quasar Medical has built a resilient operational model that helps ensure it can continue to deliver high-quality medical solutions while meeting the demands of a rapidly evolving global market.

About Workday

[Workday](#) operates at the heart of the enterprise – HR, finance, and IT – where the margin for error is effectively zero. By tightly coupling AI with the context, guardrails, and trusted processes that run the business, Workday goes beyond AI that assists work to agents that do the work and drive measurable outcomes. More than 11,500 organisations worldwide, including more than 65% of the Fortune 500, trust Workday to deliver. For more information about Workday, visit workday.com/en-hk.
